### **DETAILED ACTION**

1. Claims 1-22 were previously allowed in the Notice of Allowability of December 28, 2007.

#### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on January 18, 2008 has been entered.

#### ***Information Disclosure Statement***

3. Applicants' Information Disclosure Statement (IDS), filed January 18, 2008, has been considered by the Examiner. Please refer to the signed copy of Applicants' PTO-1449 form, submitted herewith.

#### ***Allowable Subject Matter***

4. As indicated in the previous Office Action, claims 1-22 remain allowable over the prior art.

#### ***Reasons for Allowance***

5. The following is an examiner's statement of reasons for allowance: claims 1-22, directed to a hydrogenation process for the preparation of etheramines, specifically cyanoethylethers, are allowable.

Art Unit: 1626

This invention relates to an improvement in a hydrogenation process of cyanoethylethers, wherein unreacted byproduct (acrylonitrile) is solubilized with an amide or ether solvent. Certain hydrogenation processes are known in the art, and often encounter problems such as loss of catalyst activity and product selectivity. However the aspect of the instant claimed process, with the improvement of solubilizing unreacted byproduct with an amide or ether solvent, is novel and unobvious. After a thorough search, the closest of prior art, U.S. Pat. No. 10/655,145 to Niedballa, et al. was found to teach a similar hydrogenation process of cyanoethylated glycol. However the '145 patent fails to teach or render obvious the instant claimed hydrogenation process, and does not fairly suggest the improvement wherein an amide or ether solvent is utilized to solubilize the unreacted acrylonitrile byproduct.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Telephone Inquiry***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JANET L. COPPINS whose telephone number is (571)272-0680. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph K. McKane can be reached on 571.272.0699. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
